

ABSTRACT OF THE DISCLOSURE

The present invention provides a method and a computer-readable medium containing computer-executable instructions for allowing a user of an application program to manage add-ons associated with the application program. A user interface that displays the
5 add-ons associated with the application program is provided. The user interface provides the user with the ability to disable or enable the add-ons, the ability to update certain type of add-ons. In addition, an administrator of the application program can approve or deny certain add-ons and disable a user's ability to disable or enable add-ons.
